Places and Faces in Communities

We learnt about the people and places in our community and that communities may be different but that everyone who lives in them help each other out. We will also be exploring positional language to describe and find items around the classroom and using our problem-solving skills to complete jigsaws.

We role played people in our community such as doctors and nurses. We pretended to have picnics in the parks in our community and drew pictures of people we see in our community.

We counted our poms poms to put on our socks and completed jigsaws using our maths skills.
